

Gastro Health Partnering With HyGleaCare® to Prep Patients Undergoing Colonoscopy in Miami, FL

Gastro Health patients will be able to prepare comfortably for their colonoscopy in a safe, private and hygienic environment at the HyGleaCare® Center - without a sleepless night and without having to repeatedly run to the bathroom.

HygieaCare Prep Room

“A good bowel prep is the first step in a screening colonoscopy that can detect potential cancer risks and prevent colon cancer,” said Dr. James Leavitt, President/Co-Founder of Gastro Health. “This is why we partnered with HyGleaCare to prep our patients

MIAMI, FL (PRWEB) MARCH 24, 2017

Gastro Health (“GH”) (<http://www.gastrohealth.com>) and HyGleaCare Inc. (<http://www.hygieacare.com>) announced their partnership to prep patients for colonoscopy at the HyGleaCare® Center that is to be located adjacent to the Gastro Health Endoscopy Centers in 87th Ave., Miami, FL.

The HyGleaCare® Prep, cleared by the U.S. Food and Drug Administration (FDA), will be exclusively offered by Gastro Health. The HyGleaCare prep replaces conventional prep and effectively cleans the bowel using a gentle infusion of warm, gravity-flow filtered water. This means patients may forgo many of the elements that make traditional bowel prep inconvenient and uncomfortable, and can experience simple, easy bowel prep for their scheduled colonoscopy.

“At Gastro Health we continue to care for you and those you love, while constantly improving our patients’ quality of care and experience”, said Gastro Health CEO Alejandro Fernandez.

“A good bowel prep is the first step in a screening colonoscopy that can detect potential cancer risks and prevent colon cancer,” added Dr. James Leavitt, President/Co-Founder of Gastro Health. “This is why we have partnered with HyGleaCare to prep our patients. Our patients will be able to prepare comfortably for their colonoscopy in a safe, private and hygienic environment at the HyGleaCare® Center - without a sleepless night and without having to repeatedly run to the bathroom”.

“Our team is excited at the opportunity to prep patients for colonoscopy at the new HyGleaCare® Center that we are establishing together with Gastro Health in Miami,” said Gavriel Meron, Chairman and CEO of HyGleaCare, Inc. “The Center is planned to open for business in the Fall and will be the seventh Center to be opened in the US, following Austin TX, Norfolk VA, Phoenix AZ, Dallas TX, Cincinnati OH and Jackson MS, where thousands of patients have already benefited from this preferred prep.”

The convenience of simple, same-day prep.

At the Gastro Health HyGleaCare® Center, the prep will be performed in a clean and comfortable environment. A trained tech will lead the patient to a private room where he or she is seated on an ergonomic basin. The tech walks the patient through the procedure, which routinely takes less than one hour. A small, sterile, disposable nozzle is lubricated and inserted about an inch into the rectum and a gentle stream of warm water flows into the bowel, loosening stool and causing the intestines to contract allowing for the comfortable, odorless and discreet evacuation of the colon. Water continues to gently flow until the tech determines the colon has been sufficiently cleansed.

The HyGleaCare® Prep replaces traditional prep for colonoscopy and is performed on the same day as the colonoscopy, prior to the scheduled procedure. It is safe, simple, comfortable and preferred over oral prep.
