

HyGleaCare® Prep Offers Effective Same-day Salvage Prep for Patients with Poor Oral Prep – Poster at DDW 2018

Salvage HyGleaCare® Prep Allows Patients to Complete Colonoscopy as Scheduled, Benefiting the Patient, the Endoscopist, and the Health Care Payers.

AUSTIN, TX, UNITED STATES, May 14, 2018 /EINPresswire.com/ -- HyGleaCare today announced the presentation of a poster with data from a study that included 25 consecutive patients who presented for colonoscopy but were unable to complete their prescribed [preparation](#) or reported a poor response to their traditional oral preparation or failed to adhere to their prescribed oral preparation.

These patients preferred the HyGleaCare® colonic irrigation alternative to rescheduling their procedure for another day. Each patient underwent a salvage HyGleaCare colon irrigation [prep](#) within 2-3 hours of their scheduled colonoscopy.

Patient satisfaction was high, noting that 100% of the patients reported that they would choose HyGleaCare® colonic irrigation for their next colonoscopy preparation.

Salvage HyGleaCare® colonic irrigation allows for the patient to undergo their colonoscopy as scheduled, thus mitigating the burden of rescheduling colonoscopy due to failed oral prep - otherwise incurred to the individual patient, the endoscopist, and the health care system.

The Poster, submitted by Richard Sperling MD, Parth J. Parekh MD, Dawn Burleson RN, David A. Johnson MD MACG FASGE FACP, will be presented at Digestive Disease Week® (DDW) that will take place June 2 – 5, 2018, at the Walter E. Washington Convention Center – Washington, DC.

“Over 8,000 patients have chosen HyGleaCare® Prep for their colonoscopy with 97% adequacy of prep and 95% patient willingness to repeat – with zero severe adverse events.” said Gavriel (Gabi) Meron, Chairman and Chief Executive Officer, HyGleaCare Inc. "This poster highlights the additional benefit that our partners and patients enjoy, allowing those patients who chose oral prep and then found on the day of colonoscopy that they are inadequately prepped – to perform same day salvage prep at the HyGleaCare® Center.”

About DDW

DDW is the world's largest gathering of physicians, researchers and industry in the fields of gastroenterology, hepatology, endoscopy and gastrointestinal surgery.

With more than 20,000 participants from over 80 countries, it is the world's leading educational forum for academicians, clinicians, researchers, students and trainees working in gastroenterology, hepatology, GI endoscopy, gastrointestinal surgery and related fields.

About HyGleaCare, Inc.

HyGleaCare Inc., a US Delaware corporation, commenced operations in 2015 with a goal of creating

a new standard of care to ensure patients are ready for colonoscopy utilizing the FDA cleared HyGleaCare® System.

HyGleaCare creates HyGleaCare Centers in partnership with [Gastroenterologists](#) who refer their patients with a prescription to perform a simpler and easier bowel prep for colonoscopy, performed on the same day and prior to colonoscopy. The HyGleaCare Prep replaces the traditional oral preparation that is so difficult and even impossible for many patients.

Gastroenterologists are also referring patients who are not responding well to laxatives for Constipation Relief at the HyGleaCare Centers.

HyGleaCare Centers are currently operational in Austin TX (2015), Norfolk VA (2016), Jackson MS and Cincinnati OH (2017), and a number of other Centers are currently in planning and build out phase in the US.
