HyGleaCare® Prep

Patient Instructions for HyGleaCare® Prep will be provided to you when scheduling your prep. A few days prior to your scheduled visit you will receive a call to review the instructions.

Our trained Prep Tech will lead you to your private room where you will be seated on the sanitized basin. A sterile disposable nozzle will be introduced into the rectum. A gentle stream of warm water will flow into the bowel, loosening stool.

Water continues to flow allowing you to comfortably and discreetly evacuate your colon. The Prep Tech will instruct you on completion of the procedure, which routinely takes less than an hour.

Patients Feedback:

"So much easier and comfortable than prep at home. Will definitely recommend to friends and family."

"Clear, simple, definitely recommend to others"

"This procedure is SO much better than the liquid prep method!"

"It was much better than traditional prep"

"Great process, excellent technician"

"A game changer for colonoscopy preparation"

The HyGleaCare® System is an FDA cleared prescription medical device, approved only for colon cleansing, when medically indicated, such as before radiologic or endoscopic examinations. Possible side effects include abdominal cramping, nausea, vomiting, dizziness, and clinically insignificant rectal abrasions.
